Version 1.20

Release to add the following function and fix the following issues in April 2024

■ Function added

1. A shortcut function to switch on/off the guide sound has been added.

■ Issues fixed

1. After multiple files were created while recording for a long time, normalization and export would only be possible for the last file.
2. Sometimes exported files would not open properly depending on the DAW or other application used.
3. Other minor issues have been fixed.

Version 1.10

Release to fix the following issues in February 2024

1. If the remaining battery charge was low, the unit might freeze during startup on rare occasions.
2. The remaining battery charge would not be shown accurately during USB mic use or USB file transfer.
3. Issues related to audio guide pronunciation have been fixed.
4. Other minor issues have been fixed.

Version 1.04

- Released as mass production in February 2024
