---

## Version 2.00

### • Release to add the following functions in July 2023

1. The audio interface function supports 32-bit float.
2. A function has been added that automatically connects with the dedicated F6 Control app when the F6 is started up.
3. A shortcut function has been added to show the Bluetooth menu by pressing and holding the PFL /ENTER button.
4. A function has been added that shows the SD card formatting menu by turning the power on while pressing the REC button.

## Version 1.90

### • Release to fix the following issues in July 2022

1. When the recording setting mode was Float (32bit), entering and exiting the card reader in the USB menu would cause fader settings to change.
2. When checking 32-bit float WAV files in the F6 Control app Finder, the recording format would be shown incorrectly as "32kbps".
