

H8 Handy Recorder System Software Version History

You can always download the latest system software for free on the web site shown below.

<https://zoomcorp.com/>

Version 2.20

- **Release to fix the following issue in December 2022**

1. If the noise gate threshold was set higher than -65dBFS and the unit was restarted, the setting would be changed to -80dBFS.

Version 2.10

- **Release to fix the following issues in July 2022**

1. Instead of using the power switch, if the unit was forced to shut down by removing the batteries or disconnecting the AC adapter, the device program could be broken.
2. When returning to the Home Screen from the FIELD app, the open project could be broken.
3. When recording with the punch in/out setting on in the MUSIC app, sometimes a pop-up message would appear erroneously and recording would not be possible.
4. After quitting the H8 Control app when it was connected by Bluetooth to an H8, reconnecting to the H8 from the Bluetooth menu would not work.

Version 2.00

- **Released as the following bug fixes and function updates in October 2021**

- **Function Updates**

1. Supports Capsule System 2.0 (XAH-8, EXH-8, VRH-8).
2. Added a new function that alerts when a charge-only USB cable is connected to H8.

- **Bug Fixes**

1. Track assignment to recorded files is unintentionally cancelled when mic capsule is detached after recording with MUSIC app.
2. Improved system performance.

Version 1.30

- **Released as the following bug fix in March 2021**

Version 1.20

- **Released as the bug fix and function update in September 2020**

Version 1.10

- **Released as the function updates in August 2020**

Version 1.00

- **Released as the mass production in July 2020**
