R20 Multi Track Recorder System Software Version History

You can always download the latest system software for free on the web site shown below.
https://zoomcorp.com/

Version 3.40

· **Release to fix the following issue in October 2024**
1. If recording was started after moving the playback position to a marker, the region being recorded would sometimes disappear.

Version 3.30

· **Release to fix the following issues in September 2023**
1. Rhythm track loops would not play in rare cases.
2. After swapping stereo and mono tracks, stereo tracks would sometimes play back at half speed.
3. After swapping tracks, during playback, other regions would play back repeatedly in parts without regions.
4. After moving a mono region to a different track, if a stereo region was added to the track where it had been, the waveform would sometimes not be shown correctly.

Version 3.10

· **Release to fix the following issue in July 2023**
1. When recording with a project that had a bit depth of 24-bit, the recording data could be damaged.

Version 3.00

· **Release to add the functions and fix the issues in September 2022**

Version 2.40

· **Release to support firmware that accompanied component changes and to fix the issues in July 2022**

Version 2.00

· **Released as the bug fixes and function update in March 2022**

Version 1.00

· **Released as mass production in November 2021**
