G11 Ver.2.00 Guitar Cabinet Simulations & IR Data Chart

The G11 provides total of 22 guitar cabinet emulations of all modeling amps.
Cabinet Simulations offer the sonic response of each amp's cabinet when using G11 connected to a real amplifier.

In addition, G11 provides 70 pre-loaded high-resolution impulse response (IR data) of the cabinets that were captured by placing the microphone in three different positions. Each cabinet has a recording where the mic was placed 1-inch away (2.5 cm approx.), a recording where the mic was placed 12-inches away (30 cm approx.), and one where the mic was placed in the Room.
IR Data offer a full variety of sonic responses when using G11 connected DIRECT OUT to a PA or monitor system.

Room

1-Inch   12-Inches

#	Cabinet Sim. Name	Preset Cabinet IR Data Description	IR Name		
			1-Inch	12-Inches	Room

G11 Ver.2.00 Bass Cabinet Simulations & IR Data Chart

The G11 provides bass cabinet emulations of 12 classic amp cabinets. In addition, the G11 provides 36 pre-loaded high-resolution impulse response (IRs), three different mic positions for each of the 12 cabinets. IRs offer a full variety of sonic responses when going directly to a PA or monitor system.
