1: The app itself cannot be used with this custom OS.

2: To use an Oppo device connected by USB, Settings > Additional Settings > OTG Connection must be set to on.

(This must be set every time it is connected. It will be disconnected automatically after 10 minutes without transmission.)

3: Only Input 1 will be input. When used in STREAMING mode, all channels can be mixed and input.

4: Models with Qualcomm Snapdragon CPUs were confirmed for operation.

Models with Samsung Exynos CPUs were not confirmed for operation.

Note: This information shows the results of operation confirmation conducted by our company. This is not a guarantee that no issues will occur with the above devices.
