This guide explains firmware update to v1.10 as an example.

1. Installing the firmware update file.

Download the ZIP file containing the firmware update file from G6 download page.

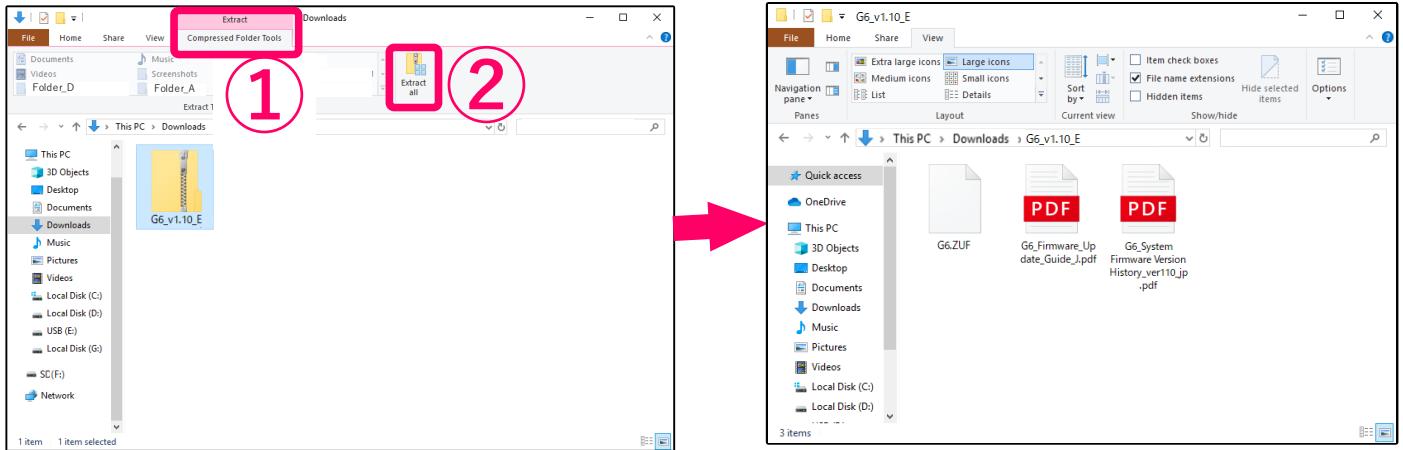

The screenshot shows a list of downloadable files and software. The items are:

- Guitar Lab Reference Guide** (9 MB pdf)
- Safety and Usage Precautions** (442 KB pdf)
- G11 Firmware Update Guide** (1 MB pdf)
- SOFTWARE** (Section Header)
- G6 Firmware** (System Version 1.10) - This item is highlighted with a red rectangular border.
- G6 ASIO Driver** (Windows 8.1/10)
- Guitar Lab | Windows** (Version 7.0 for Windows 8.1/10)
- Guitar Lab | Mac** (Version 7.0 for macOS 10.13 ~ 11)

For Windows

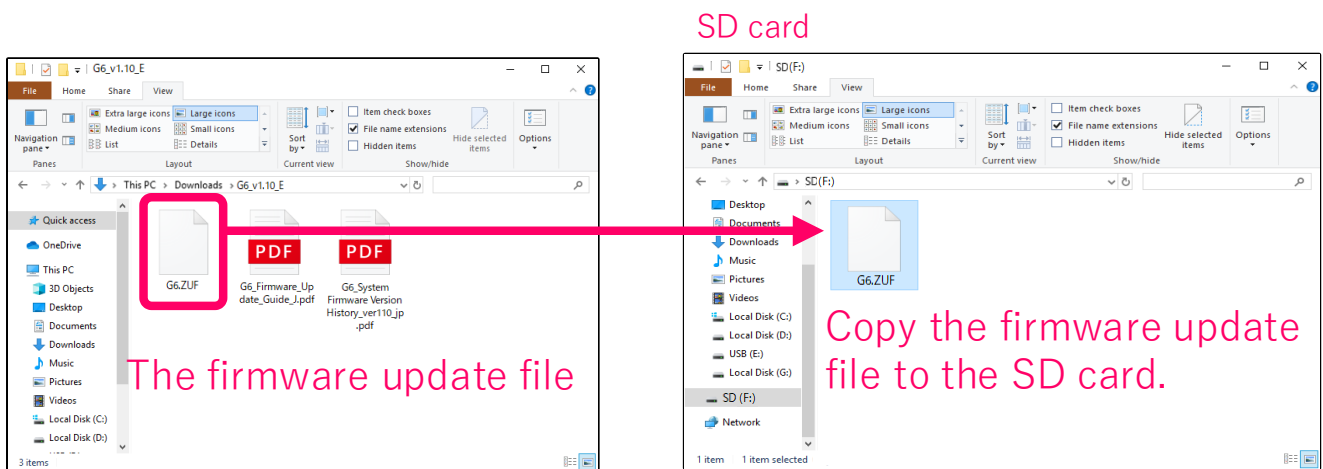

2. Extracting the ZIP file.

Select the folder where you downloaded the ZIP file. ① Click "Compressed Folder Tools", then ② "Extract All". The ZIP file will be extracted.

3. Copying the firmware update file to the SD card.

Copy the "G6.ZUF" file to the SD card.

For Mac

2. Opening the downloaded file.

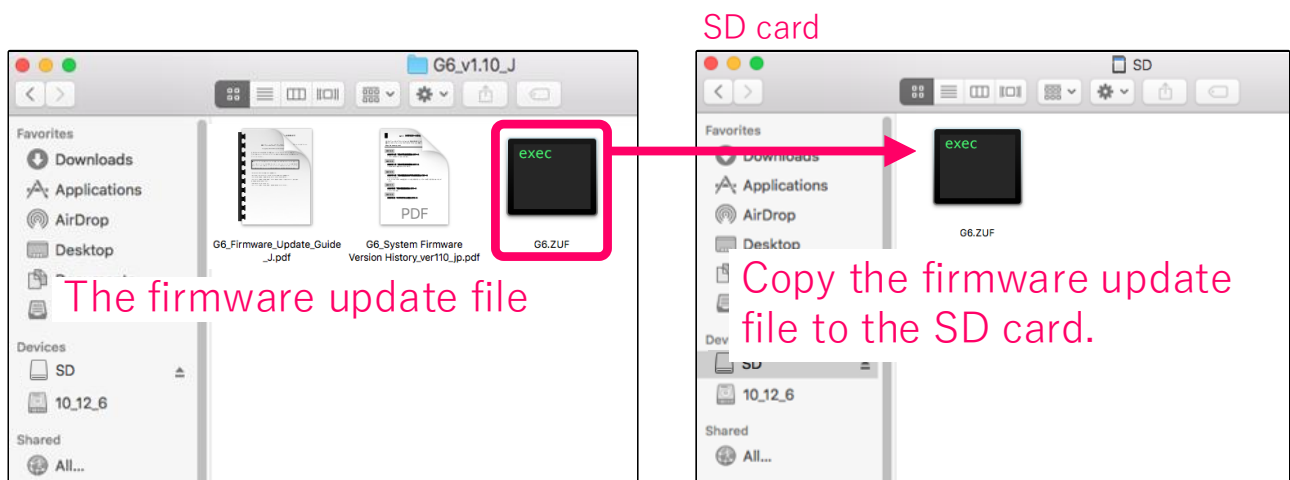

After downloading, click "Downloads" displayed at the bottom of the screen.

Then click ② to open the downloaded file.

3. Copying the firmware update file to the SD card.

Copy the "G6.ZUF" file to the SD card.

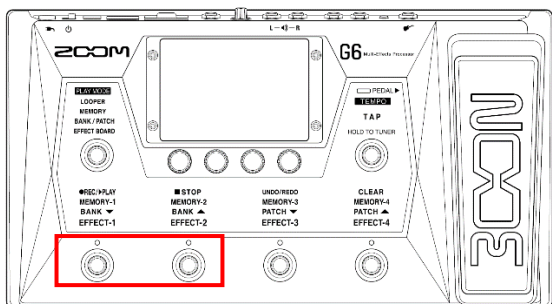

The following is the same procedure for Windows and Mac.

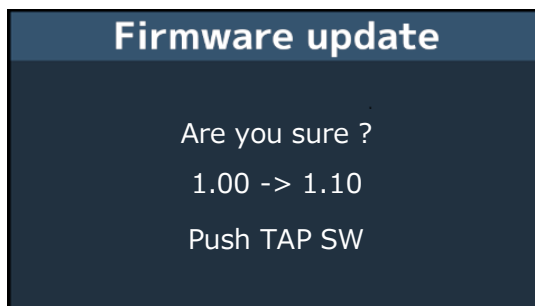

4. Connect the dedicated AC adapter (ZOOM AD-16) to the G6.
5. When the power is off, open the SD card slot cover, and insert an SD card all the way into the slot.

6. While pressing and holding the 2 foot switches, set  to on.
Press and hold the 2 foot switches until “Starting...” is displayed on the screen.

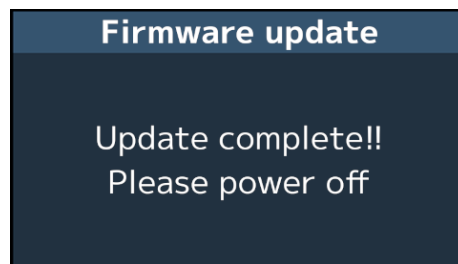

7. Press  .

[NOTE]

Do not turn the power off or remove the SD card during a firmware update. Doing so could cause the G6 to become unstartable.

8. After the firmware update completes, turn the  off.

[NOTE]

In the unlikely event that the firmware update should fail, follow the procedures from the beginning again to update the firmware.
